Comprehensive detailing frequency and product recommendations for Tesla Model Y areas, tailored to Canadian weather challenges.

Model Y Detailing Schedule for Canadian Climate

Model Y Area	Canadian Climate Challenge	Detailing Frequency	Recommended Products/Approach
Exterior Paint	Road salt, gravel chips, UV exposure	Weekly wash in winter, bi-weekly in summer	pH-neutral wash, ceramic coating or wax, PPF for high-impact areas
Glass Roof	UV intensity, water spots, tree sap	Bi-weekly exterior, monthly interior	Automotive glass cleaner, hydrophobic coating
White Seats	Road salt transfer, winter clothing dye	Weekly maintenance, quarterly deep clean	pH-neutral synthetic leather cleaner, protective coating
Wheels	Brake dust, road salt, winter grime	Weekly in summer, every 5-7 days in winter	pH-neutral wheel cleaner, wheel sealant
Undercarriage	Road salt corrosion, sand accumulation	Every 2-3 weeks in winter	High-pressure rinse, annual undercoating inspection
Door Handles	Salt/grime buildup, freezing	Every wash	Detailing brush, silicone lubricant monthly
