Prevention strategies and corrective actions for common Tesla interior challenges during Canadian winters.

Winter Interior Protection for Tesla

Winter Interior Challenge	Prevention Strategy	Maintenance Frequency	Corrective Action
Moisture/Mildew	Boot cleaning, mat removal, ventilation	Daily prevention, weekly mat cleaning	Wet-vac extraction, moisture absorbers, enzymatic cleaner
Salt Damage	High-edge mats, boot brush, minimize entry	Vacuum 2x weekly, wipe surfaces weekly	Vinegar solution neutralization, thorough rinsing
Seat Staining	Protective coating, seat covers, prompt cleaning	Weekly wipe-down, immediate spot treatment	pH-neutral cleaner, multiple treatments for set stains
Dashboard Cracking	UV/moisture protectant, temperature management	Bi-weekly cleaning, monthly protectant	Conditioning treatment, professional repair if severe
Odor Development	Moisture management, filter replacement	Daily ventilation, filter check as needed	Enzymatic cleaner, ozone treatment if persistent
